

# GET STARTED

We recommend drinking a glass of water to hydrate before starting. It will make collecting enough blood easier.

Scan the QR code or visit:  
[tests.mojoon.com/register](https://tests.mojoon.com/register)

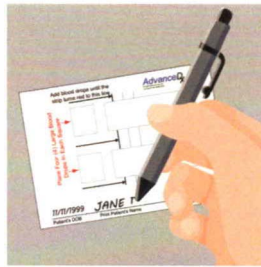

After you've registered your test and watched the video, use the instructions below to start your test.

## COLLECT SAMPLE

### 1. Prepare

Fill out the collection card with your name, today's date, and your date of birth.

Tips: Try rinsing hands in warm water to increase circulation. Increasing your heart rate helps, too. You can also try swinging your arm in a circulumotion.

### 2. Use lancet

Clean your middle or ring finger with the alcohol pad.

Twist off the lancet cap.

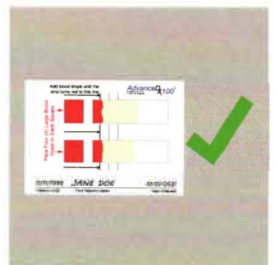

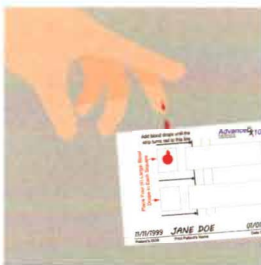

Firmly press the lancet into the side of the tip of your finger. When ready, push the button to puncture the skin.

Extra lancets are provided if needed.

### 3. Collect blood

Drip 4-6 large drops of blood onto the small square so that red blood reaches the 1st line. Do not bleed onto the rectangular section.

## RETURN

### Pack for return and mail within a day

Let the collection card dry completely.

Place the card into the foil bag.

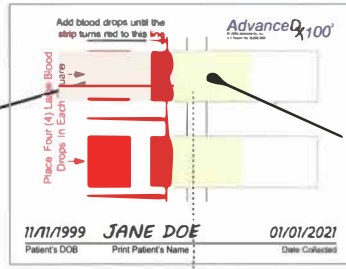

Place the foil bag into the prepaid mailer.

# THE BASICS

Bleed onto the squares.  
Do not bleed onto the  
rectangular section.

The collection card is designed to separate your whole blood into serum.

Do not smear the card.  
Do not wipe the card.

Red blood must reach the 1st line.

## HELP

(877) 760-2333

Feeling nervous? We're here to help.

Call or text us, and we'll personally walk you through your test.

Take this test within 1-2 hours of waking up.

No food or beverages (water is OK) before collecting your sample.
